***Reasons for Allowance***

1. The following is an examiner's statement of reasons for allowance: Applicant filed a Pre-Appeal Brief Request for Review on 01/14/10. Further consideration was given to Applicant's arguments regarding the unexpected result of improved granulation by using the claimed branched maltodextrins. The Rule 132 Declaration filed by Philippe Lefevre (05/13/09) and Example 2 of the instant Specification (Page 19, line 1 to Page 22, line 5) were reconsidered. The comparison between a granulation made with the branched maltodextrin (NUTRIOSE® FB06) and a granulation made with a potato based maltodextrin (GLUCIDEX® 1 – or closest prior art) shows an unexpected result of improved, homogeneous granulation. Applicant has demonstrated unexpected, superior results in the process of preparing granules with the claimed branched maltodextrins. A further prior art search did not disclose a reference that teaches the method for preparing granules of active substances containing dietary fiber consisting of granulating a mixture of active substances and the branched maltodextrins as disclosed in instant claim 10.

Therefore, the claimed invention is novel and patentably distinct over the prior art of record.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***
